

CORRECTIONS AND AMPLIFICATIONS OF INDIAN LOCALITIES
IN Dr. T. H. BECKER'S MONOGRAPH OF THE DOLICHO-
PODIDAE (DIPTERA).

By SYDNEY RIBEIRO, *Entomological Assistant, Zoological Survey of India.*

In a recent number of *Capita Zoologica* (Vol. I, pt. 4) Dr. T. H. Becker has published a monograph of the Indo-Australian Dolichopodidae in which a large number of specimens belonging to the Indian Museum are described or recorded. Many of the records of Indian species are wrongly transcribed from the printed labels, others incomplete, and Dr. Annandale has asked me to draw up a correct and amplified list. This I have done in the form of a table with four columns showing (1) the name of the species recorded, (2) the page of the monograph on which it is recorded, (3) the record as given, and (4) the record corrected and with such additions added as I have been able to find on reference to the specimens named by Dr. Becker. If corrections or additions are unnecessary the entry in the last column is left blank.
